

RENEWABLE ENERGY CHAMPION

PRESENTED TO

Cheq Bay Renewables • Bayfield

For its leadership and effectiveness in advancing renewable energy in the Chequamegon Bay area. Founded several years ago, Cheq Bay Renewables believes strongly in advancing renewable energy from the ground up. After completing a highly successful community solar project, this all-volunteer organization launched a solar group buy program in late 2017 tailored for Bayfield and Ashland counties. Cheq Bay Renewables' initiative motivated 85 households and businesses in 2018 to go solar, totaling 552 kilowatts. This was the most productive solar group buy in Wisconsin history.
